

# IR220

## description

The OrigenAE IR220 uses the Philips developed Microsoft IR module for total Windows Media Center Edition functionality. This IR Module integrates seamlessly into the Microsoft MCE operating systems and connects via an internal USB cable. This module also supports the IR Blasting feature and includes the external IR transmitters.

## features

- IR transceiver fully dedicated for Microsoft Windows XP Media Center Edition 2005
- fits S21T, S16T, S16V, S14V, S10V
- Incorporates Microsoft recommended RC6 IR protocol
- Resume from standby (S1 & S3 supported)
- Expandable for more devices via additional IR emitters
